

Institutional Decision Making & Group Behavior

Fuzzy Day Program
May 21, 2010, 8:30am - 5:00pm
New York City

SQA

Most investment decisions are made by groups of people (committees, teams, boards, or less formal groups). Groups behave differently than individuals in a number of ways. This conference focuses on how an institutional setting affects decision-making. Speakers will present concrete, empirically-based insights into how group decision making can be improved. We dub this "Behavioral Finance 2.0".

the full day program will include

Professor Nicholas Barberis, Yale University

Group Psychology and the Financial Crisis

Min Gong, Ph.D., Columbia University, Center for Research in Environmental Decisions

Group Cooperation Under Uncertainty

Professor Joseph Simmons, Yale University

Intuitive Biases in Choice vs. Estimation: Implications for the Wisdom of Crowds

Professor John Payne, Duke University

Investment Committees: Potential Benefits, Pitfalls, and Suggestions for Improvement
